

G/T Enrichment Opportunities

Accelerated Reader

K-5th grade students can choose to participate in the Accelerated Reader comprehension quiz program. Students set individual point goals, read books, and take a computerized quiz on each book. Students earn points when they answer questions correctly. Students who reach their goal will have their picture displayed in the Media Center.

Inventor's Fair

The ISD 196 Inventor's Fair teaches and encourages students to use creative problem-solving techniques and to bring creative ideas to life through the medium of invention. All ISD 196 students in grades 4 and 5 are eligible to participate. This year's fair will take place on Saturday, January 19th, 2008 at Eagan High School.

Power Math Packet Program

K-5th grade students can choose to work on four math packets during the school year. They can work independently, with a partner, or with family members. When a packet is completed, students earn a pencil, and their name is read on the morning news. If students complete all four packets, they receive a special certificate and prize at the award assembly in June.
